If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: Credit Instrument & System with Automated Payment of Clubs, Merchants, and Service provider Fees

Inventors (please provide full names): Kevin Boyle; Marty Maistre 02-01-01P02:02 RCVD
First USA Bank N.A.

Earliest Priority Filing Date: 6/04/99

**For Sequence Searches Only* Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.*

An apparatus & method for allowing a cardholder to automatically charge fees to a club, merchant or service provider, including a credit card capable of charging point-of-service transactions, and said credit card having encoded information thereon that associates the cardholder with a plurality of clubs, merchants or service providers. The apparatus & method includes a server, a monetary processing system, a dues processor, and a database.

Note: Above, "automatically charges fees" is described by applicant (pg. 4 lines 5-12) as a credit instrument that is preassociated with a series of clubs, merchants or service providers so that a cardholder can authorize automated payment for multiple business concerns in a single transaction with the card provider; or a credit instrument where the information for multiple business concerns is stored at a credit system processor so that the creation of automated payment agreements for a consumer for a plurality of such business concerns is easily effectuated.

The invention also (pg. 5 lines 3-10) comprises an apparatus and method for a card that allows a cardholder to set up auto-charge payment of dues and fees to a series of clubs, merchants and service providers, and other transactions that accept credit cards, where the **neither** cardholder nor the clubs, merchants or service providers have to initiate the payment each time after the initial set-up.

Keywords:

Database	service provider	monetary processor	dues processor	auto-charge
Computer	processor	network	server	merchants
Cardholder or user	automated-charge	auto-charge transaction	point-of-sale(or service) transaction

MosCom offers credit card
BUSINESSWORLD (PHILIPPINES), p19
July 08, 1999
JOURNAL CODE: FBWP LANGUAGE: English RECORD TYPE: FULLTEXT
WORD COUNT: 211

Internet service provider (ISP) Mosaic Communications (MosCom) recently partnered with Standard Chartered Bank to introduce MosCom Card, a Mastercard co-branded credit card for use by MosCom subscribers.

MosCom officials said subscribers can pay their regular bills with the MosCom Card, plus earn points equivalent to additional free Internet access time. A subscriber's monthly bills will be automatically charged to the card.

Dr. Willy Gan, chairman of MosCom, said subscribers have been wishing to pay their various bills online. He said the card will make it easier for subscribers to move to e-commerce. He said subscribers can also get a global roaming access and be charged locally.

Mr. Gan said MosCom plans to add retail discounts in selected stores for the card holders. As a regular credit card, the MosCom Card is also accepted in stores that accept Mastercard credit cards worldwide.

The card is initially available for MosCom subscribers in Metro

Abstract (Basic): WO 200075831 A1

NOVELTY - A database (110) contains information of associated clubs, merchants and service providers, so that applicants and cardholders (105) via a network, using encoded information can configure auto-charging and transfer funds to/for multiple business concerns at once by accessing a central server system.

DETAILED DESCRIPTION - The process auto-charge is automated such that cardholder do not require to submit payment authorization or businesses to submit charge for each payment. An INDEPENDENT CLAIM is also included for a server-based system for processing auto-charges, a method of providing a credit card system that automatically bills cardholders.

USE - For allowing cardholder automatically charge fees to club, merchant i.e. point of sale transaction or service provider.

ADVANTAGE - The inconvenience and administrative costs to the cardholder and business concerns are reduced and it encourages card loyalty of both card members and the business concerns to the card

					Div ex patent US 5727249

Abstract (Basic): US 6041315 A

NOVELTY - A laser printer (108), connected to a personal computer (102), receives data specifying a draft to generate a paper a copy of

the draft. An institution verifying unit compares a financial ID number with the entries in an institutional database to accurately verify the financial ID number.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (a) an automated payment process;
- (b) an automated payment apparatus;
- (c) and an automated distributed payment processing system.

USE - For collecting credit card payment.

ADVANTAGE - Does not require mailing of executed check. Facilitates authorized generation of payment transfer. Ensures sufficient draft generation and draft verification. Prevents generation of non-negotiable drafts. Verifies probable validity of account number. Reduces production of unauthorized drafts. Rectifies error in data transmission.

DESCRIPTION OF DRAWING(S) - The figure shows the isometric view of the components of an automated system.

Personal computer (102)

Laser printer (108)

Abstract (Basic): JP 11073530 A

NOVELTY - An automatic wireless communication is established between a payment sensor (21) installed in the bank and an automatic payment transaction unit comprised in the wrist watch (1) of user. Based on the signal received from the wrist watch of user, automatic updation of accounts in performed.

USE - For credit card in financial institution e.g. bank.

ADVANTAGE - Enables user to update money transaction, without need for going to bank. DESCRIPTION OF DRAWING(S) - The figure illustrates wireless fee payment system. (1) Wrist watch; (21) Payment sensor.

Telepoint MasterCard CT2 service launched

HONG KONG: CHEVALIER, SCB IN MASTERCARD PROJECT
South China Morning Post (XKT) 01 Aug 1995 TP p.5
Language: ENGLISH

Chevalier Telepoint, a venture between Hong Kong's Chevalier (OA) and Australia's Telstra Corp, and Shanghai Commercial Bank (SCB) plan to launch the Telepoint MasterCard, a service that offers easy payment and financial privileges to Telepoint's CT2 users. The service will enable Telepoint's CT2 customers to use the Telepoint MasterCard to automatically pay their monthly charges, take advantage of a three-month, interest-free installment option on selected merchandise and enjoy some privileges of the SCB credit cardholders. Chevalier is Hong Kong's only dedicated supplier of CT2 cordless telephone networks. *
